Add text to photo app android download

CC0/Ingo Joseph/Pixabay You've finally done it. You've made the transition to the Google Play Store. Getting used to a new system is exciting—and sometimes challenging—as you learn where to locate what you need. Fortunately, once you master the download process, you'll be filling up your smartphone or tablet with all your favorite apps. Locate the Google Play Store App To find the Google Play Store on your device, go to the apps section on your device. In some cases it's as easy as swiping up from the bottom of your screen. If your device doesn't have this as an option, find the triangle-shaped icon in your apps. Tap it to open the Google Play Store directly on the device. You need a Gmail account to use this service. The app will link to your email account, which makes it easy to backup your apps, photos, videos and other files in Google's cloud storage system. This is particularly handy if you're someone who enjoys getting the newest devices. You can log in to your Google account and have access to your previously downloaded apps and saved files. Find the Apps You Want to Download There are several ways to find apps to install on your device. You can search for apps by name or type or try out an app that the store suggests for you. If you know the name of the app you're looking for—like Twitter, Spotify or your bank—type the name in the search bar at the top of the screen. Choose the app you want from the list. If you're looking for a general type of app, such as a messenger app, type that phrase in the search box. Google Play will give you a list of different apps that are tagged to match your search criteria. When you see one you think you're interested in, click it to download the app. Google sometimes offers you suggestions for apps it thinks you'd like. You can check them out by tapping on them for download. Install the Apps After you click the button to select the app, Google Play shows you information about the app, including its creator, tags that relate to it, price, reviews from other users and a green button that says "Install." Press that button, and the device automatically downloads and installs it as long as there is storage space available. How to Update Your Apps You should keep your installed apps up to date. From time to time, developers send out notifications when they've updated their apps. These updates range from fixing bugs in the way the app works to adding new features. Some apps update on their own, but others require your permission to complete. Keeping up with these updates ensures that you always have the latest version of the app that the developer supports. To find out if your downloaded apps have updates, open your Google Play Store. Click the three lines at the top left corner of the screen and locate the "My Apps & Games" section. You'll see three tabs. The first tab takes you to a list of your apps sorted by "recently updated" and "updates pending." From here, you can either update all your apps or choose which apps to update individually. How to Uninstall Apps Sometimes you accidentally download an app that you don't really want or need or you want to clear up some space on your device. When this happens, you need to know how to uninstall apps you've downloaded. On many phones, you can do this directly on the phone interface without entering the Google Play Store. If you'd rather do this in the Google Play Store, open it. Locate the app using the search bar at the top of the screen. Tap the app and find the button to uninstall it. You'll have to confirm this step to indicate that you really want to uninstall the app. Don't worry, though. You can go back in to download it in the future if you need it. MORE FROM QUESTIONSANSWERED.NET Photo Courtesy: Future Publishing/Getty Images If you have a new phone, tablet or computer, you're probably looking to download some new apps to make the most of your new technology. Short for "application," apps let you do everything from listening to music to syncing your phone to your car to playing games. With so many apps to choose from, however, it can be a bit daunting if you don't know how to download them. Fortunately, downloading apps can be quick, simple and easy regardless of the kind of technology you're using. Read on to learn about how and where to download apps. How Downloading Apps Works When you download a file on the net, whether from a store or elsewhere, a file hosted on an online server is copied onto your computer. If you've ever been online, either on a phone or computer, you've likely already downloaded files on many occasions. Apps are no different — they're just specific kinds of files you download from the internet. Photo Courtesy: Scott Barbour/Getty Images Apps are typically set up as executable (.exe) files, although apps meant for Apple devices often come as either APP (.app) or DMG (.dmg) files. Sometimes (especially when it's meant for computers), an app is compressed into a ZIP file (.zip or .zipx) to save space. To do this, you may need another program, such as WinZip or 7-Zip, to open it, although you may also be able to open it by left- or right-clicking if your device came with the ability to open ZIP files. In many cases, however, downloading an app is as simple as clicking a button on an app's page. As long as there's enough space left on your device, the app will likely be ready for use once it's done downloading. Apps From Google Play Android is an operating system used for phones, tablets and more. Odds are that if your phone isn't an iPhone, it's probably an Android device — brands include Samsung, Huawei, LG, Motorola, ZTE and many more. To download apps for an Android device, you can either visit the Android website or use the Google Play app. (It's often pre-installed on phones and tablets, so you may already have it.) Be aware that you'll likely be prompted to sign in with your Google account or create one if you haven't already. Photo Courtesy: SOPA Images/Getty Images Open the Google Play store on your device and then search for the specific name of the app or any broader category that might interest you. Click on the app result to learn more about it. If the app is free, it should begin to download; if not, you'll be prompted to pay for it. Either way, once the file is downloaded, you're good to go. Downloading Windows Apps Microsoft hosts apps on its website, which you can access via any device with a web browser. You can use the site to download apps for tablets, computers, phones, Xbox consoles, virtual reality sets and more, so it's important to check the system requirements on each app's page to ensure that the app is compatible with your device. Photo Courtesy: Kim Kulish/Getty Images Select whichever free or paid app you're interested in to see a brief description of the app. If you choose a paid app, you'll be prompted to enter your credit card information or a gift card to complete your order. Using the Apple App Store The Apple App Store hosts apps designed for iPhones, iPads and other Apple devices. As with Google Play, it's often pre-installed on phones. Like other app stores, it lets you filter apps by category, including featured apps, newest apps, popular apps, themed categories and more. Choose the app you want and follow the onscreen directions to download it to your device. You'll need to log in or create an account complete the purchase. Photo Courtesy: Picture Alliance/Getty Images MORE FROM QUESTIONSANSWERED.NET There was a time when apps applied only to mobile devices. Thanks to Microsoft, apps are also the go-to programs for computers running Windows 8 and Windows 10. You'll need to know how to download an app from the Windows Store if you run a Windows operating system. Apps for Computers In most cases, programs and apps or applications are synonymous. Programs and apps must be installed on a system. Once installed, the software interfaces with the computer or device to perform specific actions. Computer apps usually have multiple features with extensive capabilities. Depending on the type of app, you may need to have administrative permissions prior to installation. Microsoft Store Apps The Microsoft Store distributes apps and programs designed to run on computers with Windows 8.1 or Windows 10. These apps can be accessed with mouse and keyboard, digital pens and touchscreens. You can run one app at a time, or you can use more than one app concurrently. The Microsoft Store maintains strict approval of all apps to ensure they don't come with extra bloatware. Apps are also prevented from containing adult content. After purchasing and installing an app, you get free updates. Universal Windows Apps Universal Windows apps are similar to Microsoft Store apps, but they'll work on other types of devices as well. These apps will also install on desktops and laptops with Windows 10, tablets running Windows 10, Xbox One systems and smartphones running Windows 10 mobile. Because there's some overlap with app names, it's easy to get confused about the app you need for your computer or device. Microsoft Store apps are made for devices with touchscreens. Apps not optimized for touchscreens are commonly referred to as "desktop" apps. "Windows App Store for PC" The Windows App Store offers apps for download. Sort and search for apps for Windows 10, by device, for gaming, entertainment and business. Some apps are free, while others require payment. To download an app, peruse the app listings and click on an app you wish to have. If it's free, you'll see a "get" button to click, which will download it to your computer or device. If it's not free, you'll click "buy" and enter your payment information. Downloading and Installing To download, you'll have the option to have use of the app on just the device you're currently using or across all of your options. Wait while the app downloads. Once the download finishes, you can pin it to your start menu and launch it to use it for the first time. MORE FROM QUESTIONSANSWERED.NET
